

ABOUT UNIVEDGE

IT and staffing, built around your business.

We help mid-market companies hire vetted technology talent and deliver complex IT projects - without the overhead of a big-four consultancy.

WHO WE ARE

A global IT & staffing firm, focused on what matters.

UnivEdge is a global IT and staffing firm working with mid-market companies that need senior technology talent and reliable delivery - fast.

We combine industry-specific expertise with a vetted global talent network, so our clients can scale teams, ship products, and modernize systems without compromising quality.

See how we work →

Global talent network

Vetted technology professionals across multiple disciplines and time zones, ready to start in days.

End-to-end IT solutions

From cloud and infrastructure to AI and digital transformation - one team, full accountability.

Proven delivery model

Agile execution with weekly visibility into progress, blockers, and decisions - no surprises.

Partnership mindset

We work as an extension of your team - built for multi-year relationships, not one-off placements.

WHAT WE DO

End-to-end IT and staffing solutions

Two practice areas, seven services, one team.

IT Staffing & Talent

Vetted technology professionals for contract, contract-to-hire, and permanent roles - typically shortlisted within 72 hours.

Learn more →

Software Development

Custom applications, platform modernization, and product engineering built by senior developers.

Learn more →

Cloud & Infrastructure

Secure cloud migration, multi-cloud architecture, and managed infrastructure across AWS, Azure, and GCP.

Learn more →

Digital Transformation

End-to-end programs that modernize systems, workflows, and customer experiences across the enterprise.

Learn more →

Data & Analytics

Data platforms, BI dashboards, and analytics engineering that turn data into informed decisions.

Learn more →

AI & Automation

Practical AI implementations and process automation - focused on measurable ROI, not pilots.

Learn more →

IT Consulting

Strategic guidance on architecture, tech stack decisions, and IT operating models.

WHY CHOOSE US

Why teams choose UnivEdge

Three things our clients say make the difference.

01

Specialist depth, not generalist breadth

We focus on enterprise IT and senior technology hiring. We don't do everything for everyone - and that's exactly why our clients hire us.

02

Speed without shortcuts

Vetted candidates shortlisted in **72 hours**. Project teams assembled in two weeks. Quality stays constant because our process - not our timeline - does the heavy lifting.

03

Partnership, not transactions

We're built for multi-year relationships, not one-off placements. Our **94% client retention rate** reflects how we work: as an extension of your team.

INDUSTRIES

Specialized expertise across regulated and high-growth sectors

We've worked deep in six verticals - each with its own language, regulations, and pace.

Financial Services

Compliance-grade tech and talent for banks, fintech, and asset management.

HOW WE WORK

From first call to long-term partnership

A clear six-step process - built for speed and confidence.

01

Discover

We start by understanding your goals, constraints, and what success looks like - in your words, not ours.

02

Define

We translate that into a scoped plan: deliverables, timeline, team composition, and metrics we'll track.

03

Design

We architect the solution - technical design, role profiles, or both - built for your environment.

04

Develop

We assemble the team and start building, with weekly visibility into progress and decisions.

05

Deploy

We move to production with rollback plans, performance benchmarks, and full handover documentation.

06

Deliver

We stay engaged - through SLAs, support, or ongoing partnership - for as long as you need us.

Talk to our team →

CLIENT VOICES

What clients say after we deliver

UnivEdge shortlisted three senior engineers in 48 hours. Two were hired and are still with us 18 months later. The hiring process was smooth, efficient, and exactly what we needed to scale quickly.
